## 1.1410 cski01c\_v1 (important for career: methodological knowledge)

### Properties<sup>1</sup>

Data type: numeric  
 Scale level: ordinal  
 Access ways: download-cuf, download-suf, remote-desktop-suf, onsite-suf  
 Panel Variables: aski01c, bski01c\_v1

### Question<sup>2</sup>

Question number: Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 10.1  
 Question text: How important are the following skills and competencies for your current (or last, if you are currently not in employment) professional activity (column A)? To what extent do you already possess these skills and competencies (column B)?, Knowledge of academic methods

### Frequencies

## 1.1432 cski01y (important for career: effects on nature and society)

### Properties<sup>1</sup>

Data type: numeric

Scale level: ordinal

Access ways: download-cuf, download-suf, remote-desktop-suf, onsite-suf

Panel Variables: bski01y

### Question<sup>2</sup>

Question number: Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 10a.1

Question text: How important are the following skills and competencies for your current (or last, if you are currently not in employment) professional activity (column A)? To what extent do you already possess these skills and competencies (column B)?, knowledge about the effects of my work on nature and society

### Frequencies

**1.1476 cocc19\_g1v1o (job: German Classification of Occupation 2010 (5 digits))****Properties<sup>1</sup>**

Data type: numeric

Scale level: nominal

Access ways: onsite-suf

Generation details: This variable contains the open responses gathered on career in coded form. The coding is based on the key list for the "German Classification of Occupations (KldB)" from 2010 (cf. cl-destatis-kldb-2010) of the Federal Statistical Office of Germany. The responses were coded using five digits (supplemented by special codes, if not classifiable).

Derived variables: cocc19\_v1a, cocc19\_g3v1, cocc19\_g2v1d

Panel Variables: aocc19\_g1o, boc19\_g1v1o

## 1.1484 cocc252 (public service)

### Properties<sup>1</sup>

Data type: numeric

Scale level: nominal

Access ways: download-cuf, download-suf, remote-desktop-suf, onsite-suf

Panel Variables: aocc252, bocc252

### Question<sup>2</sup>

Question number: Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 17.1

Question text: Do you work in the public sector or have an employment contract adjusted to the public sector pay scale?

## 1.1509 cocc33i\_v1 (job satisfaction: appropriateness of qualification)

### Properties<sup>1</sup>

Data type: numeric  
 Scale level: ordinal  
 Access ways: download-cuf, download-suf, remote-desktop-suf, onsite-suf  
 Panel Variables: aocc33i, bocc33i\_v1

### Question<sup>2</sup>

Question number: Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 23.1  
 Question text: How satisfied are you with your occupation? With respect to...  
 Appropriateness of qualification

### Frequencies

| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc221j_g2v1d, cocc221j_g3v1  |
| Panel Variables:    | aocc221j_g1r, bocc221j_g1v1r   |

**1.1528 cocc221k\_g1v2d (1st job: location of work (NUTS-2))****Properties<sup>1</sup>**

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |

**1.1541 cocc222j\_g1v1r (2nd job: location of work (federal state/country))****Properties<sup>1</sup>**

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc222j_g2v1d, cocc222j_g3v1  |
| Panel Variables:    | aocc222j_g1r, bocc222j_g1v1r   |

**Question<sup>2</sup>**

|                  |   |
|------------------|---|
| Question number: | Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 24a.1  |
| Question text:   | In the following we ask you for a more detailed description of the various occupations which you had in the year 2010 and thereafter. Please include work which began earlier if it continued in 2010. ,time period (month/year), Type of employment, working time (contractually agreed), professional position, work location, firm/company, federal state or country (if abroad) |

**1.1546 cocc222k\_g1v2d (2nd job: location of work (NUTS-2))****Properties<sup>1</sup>**

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |

## 1.1559 cocc223j\_g1v1r (3rd job: location of work (federal state/country))

### Properties<sup>1</sup>

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc223j_g2v1d, cocc223j_g3v1  |
| Panel Variables:    | aocc223j_g1r, bocc223j_g1v1r   |

## 1.1564 cocc223k\_g1v2d (3rd job: location of work (NUTS-2))

### Properties<sup>1</sup>

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |
| Derived variables:  | cocc223k_g2v2o, cocc223k_v2a  |
| Panel Variables:    | aocc223k_g1d, bocc223k_g1v1d  |

### Question<sup>2</sup>

|                  |   |
|------------------|---|
| Question number: | Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 24b.1  |
| Question text:   | In the following we ask you for a more detailed description of the various occupations which you had in the year 2010 and thereafter. Please include work which began earlier if it continued in 2010. ,time period (month/year), Type of employment, working time (contractually agreed), professional position, work location, firm/company, (all digits of the postal code) ,Place (if postal code is unknown) |

**1.1577 cocc224j\_g1v1r (4th job: location of work (federal state/country))****Properties<sup>1</sup>**

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc224j_g3v1, cocc224j_g2v1d  |
| Panel Variables:    | aocc224j_g1r, bocc224j_g1v1r   |

## 1.1582 cocc224k\_g1v2d (4th job: location of work (NUTS-2))

### Properties<sup>1</sup>

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |
| Derived variables:  | cocc224k_g2v2o, cocc224k_v2a  |
| Panel Variables:    | aocc224k_g1d, bocc224k_g1v1d  |

## 1.1595 cocc225j\_g1v1r (5th job: location of work (federal state/country))

### Properties<sup>1</sup>

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc225j_g3v1, cocc225j_g2v1d  |
| Panel Variables:    | aocc225j_g1r, bocc225j_g1v1r   |

## 1.1600 cocc225k\_g1v2d (5th job: location of work (NUTS-2))

### Properties<sup>1</sup>

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |
| Derived variables:  | cocc225k_v2a, cocc225k_g2v2o  |
| Panel Variables:    | aocc225k_g1d, bocc225k_g1v1d  |

### Question<sup>2</sup>

|                  |   |
|------------------|---|
| Question number: | Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 24d.1  |
| Question text:   | In the following we ask you for a more detailed description of the various occupations which you had in the year 2010 and thereafter. Please include work which began earlier if it continued in 2010. ,time period (month/year), Type of employment, working time (contractually agreed), professional position, work location, firm/company, (all digits of the postal code) ,Place (if postal code is unknown) |

| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc226j_g2v1d, cocc226j_g3v1  |
| Panel Variables:    | aocc226j_g1r, bocc226j_g1v1r   |

**Question<sup>2</sup>**

|                  |   |
|------------------|---|
| Question number: | Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 24e.1  |
| Question text:   | In the following we ask you for a more detailed description of the various occupations which you had in the year 2010 and thereafter. Please include work which began earlier if it continued in 2010. ,time period (month/year), Type of employment, working time (contractually agreed), professional position, work location, firm/company, federal state or country (if abroad) |

**Frequencies**

## 1.1618 cocc226k\_g1v2d (6th job: location of work (NUTS-2))

### Properties<sup>1</sup>

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |
| Derived variables:  | cocc226k_g2v2o, cocc226k_v2a  |
| Panel Variables:    | aocc226k_g1d, bocc226k_g1v1d  |

| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc227j_g2d, cocc227j_g3  |
| Panel Variables:    | bocc227j_g1r   |

## 1.1636 cocc227k\_g1v1d (7th job: location of work (NUTS-2))

### Properties<sup>1</sup>

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |
| Derived variables:  | cocc227k_v1a, cocc227k_g2v1o  |
| Panel Variables:    | bocc227k_g1d  |

### Question<sup>2</sup>

|                  |   |
|------------------|---|
| Question number: | Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 24f.1  |
| Question text:   | In the following we ask you for a more detailed description of the various occupations which you had in the year 2010 and thereafter. Please include work which began earlier if it continued in 2010. ,time period (month/year), Type of employment, working time (contractually agreed), professional position, work location, firm/company, (all digits of the postal code) ,Place (if postal code is unknown) |

## 1.1649 cocc228j\_g1r (8th job: location of work (federal state/country))

### Properties<sup>1</sup>

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc228j_g2d, cocc228j_g3  |
| Panel Variables:    | bocc228j_g1r   |

### Question<sup>2</sup>

**1.1654 cocc228k\_g1v1d (8th job: location of work (NUTS-2))****Properties<sup>1</sup>**

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |

## 1.1667 cocc229j\_g1r (9th job: location of work (federal state/country))

### Properties<sup>1</sup>

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc229j_g2d, cocc229j_g3  |
| Panel Variables:    | bocc229j_g1r   |

### Question<sup>2</sup>

|                  |   |
|------------------|---|
| Question number: | Questionnaire of the DZHW Graduate Panel 2005 (third wave, main survey): 24h.1  |
| Question text:   | In the following we ask you for a more detailed description of the various occupations which you had in the year 2010 and thereafter. Please include work which began earlier if it continued in 2010. ,time period (month/year), Type of employment, working time (contractually agreed), professional position, work location, firm/company, federal state or country (if abroad) |

## 1.1672 cocc229k\_g1v1d (9th job: location of work (NUTS-2))

### Properties<sup>1</sup>

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |
| Derived variables:  | cocc229k_v1a, cocc229k_g2v1o  |
| Panel Variables:    | bocc229k_g1d  |

## 1.1685 cocc2210j\_g1r (10th job: location of work (federal state/country))

### Properties<sup>1</sup>

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | The tenth job was added during data preparation. A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.  |
| Derived variables:  | cocc2210j_g2d, cocc2210j_g3  |

### Question

No question is assigned to this variable.

**1.1689 cocc2210k\_g2o (10th job: location of work (postcode 3 digits))****Properties<sup>1</sup>**

Data type: numeric

Scale level: nominal

Access ways: onsite-suf

Generation details: This variable was generated for the purposes of anonymisation by aggregation of the employment location (post code 5 digits). For details cf. the generation rule.

Annotations: The tenth job was added during data preparation.

Derived variables: cocc2210k\_g1d, cocc2210k\_a

## 1.1690 cocc2210k\_g1d (10th job: location of work (NUTS-2))

### Properties<sup>1</sup>

|                     |   |
|---------------------|---|
| Data type:          | string  |
| Scale level:        | nominal   |
| Access ways:        | download-suf, remote-desktop-suf, onsite-suf  |
| Generation details: | This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned. |
| Annotations:        | The tenth job was added during data preparation.  |
| Derived variables:  | cocc2210k_a, cocc2210k_g2o  |

### Question

No question is assigned to this variable.

### Frequencies

| Value                  | Label | Frequency     | Percentage (valid) | Percentage  |

**1.1703 cocc2211j\_g1r (11th job: location of work (federal state/country))****Properties<sup>1</sup>**

|                     |  |
|---------------------|--|
| Data type:          | numeric  |
| Scale level:        | nominal  |
| Access ways:        | remote-desktop-suf, onsite-suf   |
| Generation details: | This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable). |
| Annotations:        | The eleventh job was added during data preparation. A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.   |
| Derived variables:  | cocc2211j_g3, cocc2211j_g2d  |

## 1.1704 cocc2211j\_g2d (11th job: location of work (federal state or abroad))

### Properties<sup>1</sup>

Data type: numeric

Scale level: nominal

Access ways: download-suf, remote-desktop-suf, onsite-suf

Generation details: This variable was generated for the purposes of anonymisation by aggregation of the employment location. For details cf. the generation rule.

Annotations: The eleventh job was added during data preparation.

Derived variables: cocc2211j\_g3, cocc2211j\_g1r

### Question

No question is assigned to this variable.

### Frequencies

Data type: string

Scale level: nominal

Access ways: download-suf, remote-desktop-suf, onsite-suf

Generation details: This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned.

Annotations: The eleventh job was added during data preparation.

Derived variables: cocc2211k\_g2o, cocc2211k\_a

**Question**

No question is assigned to this variable.

**Frequencies**

| Value                  | Label | Frequency     | Percentage (valid) | Percentage |

**1.1721 cocc2212j\_g1r (12th job: location of work (federal state/country))****Properties<sup>1</sup>**

Data type: numeric

Scale level: nominal

Access ways: remote-desktop-suf, onsite-suf

Generation details: This variable contains the gathered open responses on federal state resp. country (for abroad) where the employment is located in coded form. For the coding of the federal states the Federal Statistical Office of Germany key of federal states (cf. cl-destatis-bundesland-1990) according to the Official Municipality Code (AGS) (with supplements, if not assignable) was used. The countries (for abroad) were coded using the Federal Statistical Office of Germany classification of states and territories (cf. cl-destatis-ausland-2016) (supplemented by special codes, if not classifiable).

Annotations: The twelfth job was added during data preparation. A different country nomenclature (3 digits) than in waves 1 and 2 (2 digits) was used for foreign countries.

Derived variables: cocc2212j\_g2d, cocc2212j\_g3

**Question**

No question is assigned to this variable.

**Frequencies**

**1.1726 cocc2212k\_g1d (12th job: location of work (NUTS-2))****Properties<sup>1</sup>**

Data type: string

Scale level: nominal

Access ways: download-suf, remote-desktop-suf, onsite-suf

Generation details: This variable was generated for the purposes of anonymisation by aggregation of the employment location. For aggregation, the list "Tercet NUTS-postal codes matching tables" of the Statistical Office of the European Union (Eurostat) 2010 was used (cl-eurostat-deplznuts-2010). This list contains the five-digit postcode and the corresponding NUTS-3 region from which the NUTS-2 regions were generated. If the postcodes were matched to more than one NUTS-2 region, the missing value "-966 not determinable" was assigned.

Annotations: The twelfth job was added during data preparation.

Derived variables: cocc2212k\_a, cocc2212k\_g2o
