### Properties<sup>1</sup>

Data type:	numeric
Scale level:	ratio
Access ways:	SUF: On-Site, SUF: Remote-Desktop, SUF: Download, CUF: Download
Generation details:	Merging the information on financing by scholarship (feinstio: variable not included in the published data set) and the open information on other sources of financing (feinandqo: variable not included in the published data set). In the case of open text responses that clearly belonged to the "scholarship" category, the amount of money from the "other sources of financing" was added to the amount from the "scholarship" category.
Derived variables:	feinstio

**Question<sup>2</sup>**

Question number: Questionnaire of "The Student Survey in Germany (2021)": E4\_6

Question text: The following section deals with salary differences between graduates of different areas of study and whether you feel that these differences are justified.

Graduates in medicine earn on average about €53,000 a year (gross annual full-time salary) when they enter the job market. By contrast, graduates in the economics and business administration earn on average about €43,000 a year.

To what extent do you think it is justified that graduates in the fields of medicine earn more than graduates in the economics and business administration right after graduation?

### Question<sup>2</sup>

Question number: Questionnaire of "The Student Survey in Germany (2021)": E4\_8

Question text: It is not always easy to find a job after graduation. Apart from legitimate reasons for being turned down (e.g. applicant profile does not fit the job), discrimination can also be a contributing factor. Discrimination means that a person is treated worse than other people without any factual justification.

In your opinion, what are the reasons for this discrimination?

No
