Reading Aid

[Filter conditions are prefixed to the question]

X0 Question numbers and question texts are shown in bold.

[‘stage directions’ are written in italics in square brackets - these do not control whether respondents get a question, but give technical hints for the presentation or adapt formulations in question text or answer options].

Note texts for respondents are set in italics

X1

[everyone]

Now for coffee. Do you know coffee?

- Yes, I do.
- No, I don't.

X2

[if X1 („Knows coffee“) = 1 („Yes“)]

Do you drink coffee?

*[The order of the items is randomized once so that all respondents get the same order]
(multiple answers possible.)*

- Yes, right now.
- Yes, in the past.
- No, never.

X3

[if {X2 („drinks coffee“) = 1 („Yes, right now“) or 2 („Yes, in the past“)}]

[Visible condition: if X2 („drinks coffee“) = 1 („Yes, right now“)]

To what extent do you find this pleasant?

[Visible condition: if X2 („drinks coffee“) = 2 („Yes, in the past“)]

To what extent did you find this pleasant?

- | | | | | | |
|------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| very un- | | | | | very |
| pleasantly | | | | | pleasantly |
| | 1 | 2 | 3 | 4 | 5 |
| | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

Reading example:

Question X1 is displayed to all respondents.

Question X2 is only displayed if the first answer option ("Yes, I know") was selected for question X1.

Question X3 is only displayed if one of the first two answer options was selected for question X2 (by chaining the questions it should be clear that question X1 must have been answered with "Yes, I know" before). There are also different question texts, depending on which answer was given for question X2 (present or past form). In this case, the formulation of the answers remains identical - if, for example, the answers of an item battery have to be adapted to the tempus of the question in the case of several question texts, the entire item battery is displayed under each question in a suitable formulation for better readability.

Warning notices

A red warning will appear if

- an entry is considered invalid because it lies outside a realistic value range or
- if the answer to the question is absolutely necessary for the continuation of the questionnaire. This only applies to the following pages:
 - Z1/index (home page)
 - A1 (Status of PhD/doctorate)

Example:

How far along are you with your PhD/doctorate?

I have accomplished ca. |2|0|0| % .

[Warning notice] Please enter a value between 0 and 100.

Explanation [EC]

The term [EC] (exclusive category) is used when one answer option excludes all other options in a multiple selection question and therefore this answer cannot be combined with any of the other answer options.

Example:

Why did you decide to do your PhD/doctorate at this university?

Please select all that apply.

- Because I wanted to be at this location
- Because of the good research conditions in my discipline
- Because of the supervisor
- Because of the good reputation of the university
- Because there are attractive services for doctoral candidates
- It just came about that way. [EC]
- Other reasons, namely: _____

Variable mapping

The variables assigned to the questions were inserted in a text field. Red text in a text field means that the respective variable is included in the published data, whereby the data and methods report can be used to determine the access route(s) via which the respective variable can be used. Grey text in a text field means that the respective variable is not included in the published data.

Discrepancy of the question numbers in the FDZ research portal

Please note that the question numbers in the FDZ search portal (<https://metadata.fdz.dzhw.eu/>) differ slightly from the question numbers in this document. The question numbers in the search portal all end with the suffix “.1”, for example question “A10” from the present document is called “A10.1” in the search portal. In addition, single-digit numbers within the question number contain two digits with a leading zero in the search portal, for example question “A1” from the present document is called “A01.1” in the search portal.

Citation and Reuse

Please cite this questionnaire or specific questions from it according to the general [citation guideline](#).

When reproducing the complete text of a question, for example within an article or when reusing the question for own research projects or questionnaires, it should be noted that there may be further conditions of use for questions already used secondarily within Nacaps (cf. the documentation in the data and methods report). It is recommended to check the sources to determine whether and, if so, under what conditions reproduction or reuse is possible.

For a German version of the survey please click the flag in the header!

Depending on your personal life situation, the survey will take about 25 to 35 minutes. You can also complete the survey on your smartphone, but answering on a larger screen is easier and faster. You can interrupt the survey at any time and continue at a later moment. Once you have answered all the questions, you will then have the opportunity to participate in the announced raffle.

We already thank you for participating in the survey at this point!
