

# Staircase Survey

## SUSTAINABLE WORKING CONDITIONS IN ACADEMIA SURVEY (STAIRCASE)

## Informed consent form

The EU-funded project “Researcher Mental Health Observatory” (ReMO) is conducting the largest ever benchmark study to assess the state of work-related wellbeing and mental health among researchers in Europe. ReMO is a network of researchers, working in work and organizational psychology, science policy and data science from 37 European countries that care about working conditions of academics. ReMO is lead by the researchers from the Leibniz-Informationszentrum Technik und Naturwissenschaften | Universitätsbibliothek in Germany, the University of Amsterdam in the Netherlands, and the University of Technology Graz in Austria.

We strive to adhere to the highest standards of transparency and openness while protecting the sensitive information collected in this study. In the following, we will provide you with information about the aim of this study, benefits and risks associated with participation in this study as well as information about data usage and data protection. Therefore, before participating in the study, please read the following document carefully.

If you have any concerns or questions at any point before, during or after participating in this study, do not hesitate to contact us at [STAIRCASE-Survey@tib.eu](mailto:STAIRCASE-Survey@tib.eu) (mailto:STAIRCASE-Survey@tib.eu).

For your convenience we also provide translations of this consent form to [Spanish](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_ES.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_ES.pdf), [French](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_FR.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_FR.pdf), [German](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_DE.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_DE.pdf), [Italian](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_IT.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_IT.pdf), [Hebrew](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_HE.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_HE.pdf), [Croatian](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_CRO.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_CRO.pdf), [Portugues](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_PR.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_PR.pdf), [Turkish](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_TR.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_TR.pdf), [Romanian](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_ROM.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_ROM.pdf) and [Macedonian](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_MKD.pdf) (https://projects.tib.eu/fileadmin/data/staircase/docs/informed\_consent\_MKD.pdf).

## What is the purpose of this study?

The purpose of this study is to gain insights about the causes of workplace wellbeing and mental health in academia in order to develop tailored, effective, and efficient interventions that improve the mental health of academics.

## Why should you participate?

This study is conducted by researchers for researchers. Our explicit aim is to change the academic system from within, in a way that allows for healthy and sustainable working conditions. By providing us with information about your mental health and working conditions, we will be able to draw inferences that help us evidence and inform recommendations for policy changes. Your efforts will help us to ensure adequate representation of your institution and country, and improves the odds that we will ultimately have enough data to formulate institution- and country-specific recommendations specific to your context and circumstances.

## What are the risks of participation?

We have implemented protection measures to safeguard your data (see section “Data protection” below). This is necessary because the information you provide us with may bear the risk of re-identification through unique combinations of demographic information. This is potentially possible for example if you are the only female physics PostDoc in your institution. We will not publicly release any data in which individuals can be identified in any way.

By participating in this survey you will be confronted with questions about your mental health. We will ask you about symptoms of mental disorders such as depression and anxiety. Thinking about and answering these questions might prompt you to discover a mental health issue you were previously not aware of. To mitigate this risk, we provide information about contact points and help lines that can help you with any mental health issues that you may be facing. The [Samaritans](https://www.mhe-sme.org/library/youth-helplines/) (https://www.mhe-sme.org/library/youth-helplines/) offer a global crisis hotline you can reach at 116 123. In addition, you can use the following services to find a helpline specific to your country:

- [Mental Health Europe](https://www.mhe-sme.org/library/youth-helplines/) (https://www.mhe-sme.org/library/youth-helplines/) for countries in the EU

- [findahelpline](https://findahelpline.com/) (https://findahelpline.com/) for countries in- and outside the EU

## What is involved in participating in the study?

The study involves filling out an online survey that will take approximately 15 minutes. The questions will include measures of mental health, such as symptoms of depression, as well as measures of wellbeing such as work satisfaction. In addition, we will ask you questions about your work as an academic, such as how many hours you work per week and how much of your time you spend on different tasks. Lastly, we will ask you demographic questions such as your age and gender. All questions are voluntary and you can skip questions at any point in the survey.

You will have the possibility to voluntarily provide us with identifiers of your profiles on ORCID, LinkedIn, Twitter and Mastodon at the end of the survey. This information will be stored separately from your survey responses. It allows us to link mental health and working conditions to other observables such as research performance, career paths, and sentiment on social media.

If the course of the project within the scope of this project or a planned follow-up project allows it, we would like to survey you again. For this purpose, you will have the option of providing us with your contact details at the end of the survey. As soon as it is clear that there will no longer be a repeat survey, we will delete this contact data. If you have given us your contact data but wish to have your contact data deleted at any point after this survey, you can have your contact data deleted at any time. To do so, please contact the project via one of these addresses: [STAIRCASE-Survey@tib.eu](mailto:STAIRCASE-Survey@tib.eu) (mailto:STAIRCASE-Survey@tib.eu) or [datenschutz@tib.eu](mailto:datenschutz@tib.eu) (mailto:datenschutz@tib.eu).

## Who is behind this study?

The study is conducted by researchers within the EU Funded [COST Action CA19117](https://www.cost.eu/actions/CA19117) (https://www.cost.eu/actions/CA19117) "Researcher Mental Health Observatory" - ReMO. The action focuses on wellbeing and mental health within academia, a theme of strategic importance for the European Research Area. You can find more details about ReMO on the project [website](https://projects.tib.eu/remo/) (https://projects.tib.eu/remo/). The institution responsible for coordinating this survey is TIB – Leibniz-Informationszentrum Technik und Naturwissenschaften | Universitätsbibliothek.

The data will be archived by the German Center for Higher Education and Science Research (DZHW) on behalf of TIB and made available for secondary use (see section "Data usage, sharing and archiving" below). In addition, responsibility for the collected data may also be transferred to the DZHW after the end of the project.

If you have any concerns or questions at any point before, during or after participating in this study, do not hesitate to contact us at [STAIRCASE-Survey@tib.eu](mailto:STAIRCASE-Survey@tib.eu) (mailto:STAIRCASE-Survey@tib.eu).

## How can I withdraw from this study?

Your participation in this research study is voluntary. You can withdraw from the study at any point without providing any reasons for doing so and without consequences. To withdraw from the study, simply do not continue to fill in the survey questionnaire. Your responses will be recorded up to the point where you stopped filling in the survey. Regarding further rights please see the section "Your Data Protection Rights under the General Data Protection Regulation (GDPR)".

## Data usage, sharing and archiving

Data collected in this study will be used for the following purposes:

1. The survey response data including all demographic information (pseudonymised data) will be stored in a secure long-term data storage facility. Researchers affiliated with academic institutions can request access to the data to conduct research and disseminate research results. After signing a data use agreement, data access will be provided in a secure data analysis environment with output controls that ensure that no personally identifying information leaves the archive. Research results shared with the public will only contain aggregated data and will not allow re-identification of respondents.
2. A second version of the survey response data will be anonymized by removing and aggregating demographic information such that no individual can be re-identified (anonymised data). This anonymized data set is made available to the general public after registration together with terms of use.
3. The collected identifiers of ORCID, LinkedIn, Twitter and Mastodon profiles will be stored separately from survey responses and shared with researchers within the ReMO project for the purpose of collecting information from these profiles only. The collected identifiers will be deleted after the end of the project. Information obtained from the profiles such as the average sentiment in tweets in the last month will be aggregated and merged with the survey response data and made available for analysis in the secure data analysis environment (see point 1).

The legal basis for the collection of the data is informed consent, as specified in [Article 6\(1a\) of the GDPR](https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32016R0679) (https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32016R0679). All terms relating to data protection are based on GDPR.

## Data protection measures

Your responses will be confidential. Any identifying information such as your email address or any social media profiles that you voluntarily provide to us will be stored separately from your survey responses. A detailed description of all data protection measures can be found in our [data protection plan](https://doi.org/10.17605/OSF.IO/9TR74) (https://doi.org/10.17605/OSF.IO/9TR74). Below we provide a summary of data protection measures when data is collected, transferred, processed, archived and accessed by researchers.

- **Data collection:** data is collected with the software [LimeSurvey](https://www.limesurvey.org/de/) (https://www.limesurvey.org/de/) which is hosted on a server at the Technische Informationsbibliothek Hannover (TIB) in Germany. Data is transferred from each respondent to the server over an encrypted SSL connection and stored in an encrypted data base upon arrival at the server. Each survey participant is assigned a unique survey participation token. Survey responses are stored alongside participation tokens and therefore pseudonymized. Participant email addresses are stored in a separate table that is not linked to survey responses and are used to prevent double participation.
- **Data transfer:** After the data collection phase of the study is concluded, all collected and encrypted data will be transferred to a long-term data storage facility. Subsequently, all data will be deleted from the TIB server.
- **Data processing:** At the end of the data collection period, participant email addresses are processed with a salted hash function and survey participation tokens are replaced with the hash values of the email addresses. This is done to enable tracking of participants over survey waves given the same email address. The resulting data set is pseudonymized (Scientific Use File). It is not fully anonymized because participants can potentially still be identified given their demographic information. An anonymized data set (Campus Use File) will be created by aggregating and removing demographic information until no single participant can be re-identified.

In addition, a second hash value is generated for each participant by running the hash function over the email addresses with a different salt. These values are stored alongside a participant's social media information and separately from survey responses, to prevent a direct link between survey responses and social media profiles. A table that links both hash values and that can be used to merge social media information with survey responses is stored at TIB. Only members of the ReMO project under supervision of the TIB data protection officer will be able to link personal identifiers and survey responses. This table will be deleted at the end of the project.

- **Data archiving:** Pseudonymised and anonymised data will be archived at a long-term storage facility. The archive system will be subject to strict access rights. Only authorized employees of the facility are allowed to transfer objects eligible for long-term preservation to the digital archive or remove them from the archive.
- **Data access:** Authorized researchers will be able to access the pseudonymized data either in person at a computer in the long-term storage facility or via remote access to a server that holds the data and pre-installed analysis programs. Researchers will have to sign data use agreements before being granted access to the data. Researchers will have to subject any files they want to export to an output control by staff of the long-term storage facility and ReMO project members to exclude any possibility of re-identification of individuals. Output controls ensure that exported data are anonymised.
- **Term of storage of data:** The social media handles will be deleted at the end of the ReMO project. The pseudonymised dataset (Scientific Use File) and the anonymised dataset (Campus Use File) will be stored longterm and made available as described above via the long-term storage facility and only be deleted upon request.

## Ethical considerations for this study

This study was evaluated by the Ethics Commission of the Leibniz University Hannover and approved under ethics vote EV LUH 04/2023.

## Dissemination of results from this study

Results derived from this study will be disseminated in a variety of ways:

- We will publish a fully anonymised version of the data collected in this study
- We will disseminate findings via academic articles and conference presentations.
- We will use the findings to write white papers and policy recommendations with the aim of changing working conditions in academia.

If you want to be informed of any results derived from the survey that are published, you will have the option of providing us with a contact email address at the end of the survey.

## Your Data Protection Rights under the General Data Protection Regulation (GDPR)

You have the right to obtain information about the personally identifiable information collected in this survey at any time, as well as the right to rectify or erase or restrict data processing. You have a right to revoke your consent to data processing as well as the right of data portability. To exercise your rights, please contact [STAIRCASE-Survey@tib.eu](mailto:STAIRCASE-Survey@tib.eu) (mailto:STAIRCASE-Survey@tib.eu).

Note that you can only request, delete or rectify the information in the pseudonymised data, since we are not able to identify individuals in the anonymised data anymore. To exercise your rights, you will need to provide us with the email address you used to fill in the survey in the first place to identify your records.

**Data protection responsibilities throughout the project (until Dez. 2024)**

**Responsible authority regarding data protection** is the German National Library of Science and Technology (TIB), Welfengarten 1B, 30167 Hannover, Germany. Phone: +49(0)511 762-8989, Fax: +49(0)511 762-4076, Email: [information@tib.eu](mailto:information@tib.eu) (mailto:information@tib.eu)

There are 139 questions in this survey.

## Section A - Demographics

In the below section we are going to ask you about demographic information. To find out what does and does not work for whom and under which conditions, we need demographic information to contextualize our findings for different groups of people.

Do you currently hold an academic position? \*

Please choose **only one** of the following:

- Yes
- No
- I don't know
- I prefer not to say

Academic position refers to a research or teaching position or a PhD study/candidacy at a public or private research institution, not including purely administrative or technical positions or positions in the industrial sector.

### What is your primary position? \*

Please choose **only one** of the following:

- First stage researcher (PhD student or candidate)
- Recognized researcher (Postdoc, junior lecturer, researcher...)
- Established researcher (senior lecturer, senior researcher, assistant/associate professor,...)
- Leading researcher (Full Professor,...)
- I prefer not to say
- Other

Your main place of work or study is the place for which you spend most of your working or studying time. If there are two such places for which you spend an equal amount of time, choose one. Note that this also applies if you mainly work from home or have a part-time academic position.

**Please identify your current main place of work or study: \***

Only answer this question if the following conditions are met:

(((! is\_empty(A6France.NAOK (/remosurvey/index.php/questionAdministration/view/surveyid/817261/gid/463/qid/12169)) && (A6France.NAOK (/remosurvey/index.php/questionAdministration/view/surveyid/817261/gid/463/qid/12169) == "AO12"))))

## Section C - Working and Studying Conditions

In the below section we are going to ask you about the conditions of your main place of work or study in academia. Your main place of work or study is the place for which you spend most of your working or studying time. If there are two such places for which you spend an equal amount of time, choose one. This information is important for us to be able to relate mental health outcomes to different working/studying conditions and derive recommendations for changes in how academic work is organized to improve mental health of academics.

## Section E - Leadership and Supervision

In the below section we are going to ask you about your working relationship with your leader and (if applicable) supervisor. Here, "leader" refers to that person who directly influences how work in your team is organized. This could for example be your group leader or department head, depending on your position. "Supervisor" refers to a person that has a say in how you conduct your research or studies. We mainly expect doctoral researchers and potentially PostDocs to have supervisors, whereas we expect all researchers to have leaders. Leaders and supervisors have a large impact on wellbeing in a professional context. Understanding how these people interact with you in your professional context gives important context to understand mental health outcomes in the academic context.

Please choose the appropriate response for each item: My leader... \*

## Section G - Optional information

In this section, we are asking for some information about you, which are very useful for our study but make you identifiable and are therefore optional. We are interested in collecting these data to explore relationships with the mental health of variables that we have not measured on this survey. For instance, having access to ORCID IDs will allow us to explore whether people with a relatively higher or lower number of publications per year suffer poorer mental health. Note that although your provision of these data will make you identifiable to the research team, your data will be treated in strict confidence, and in accordance with the GDPR and ethical guidelines.

## Your rights under GDPR

You have the right to obtain information about the personally identifiable information collected in this survey at any time, as well as the right to rectify or erase or restrict data processing. You have a right to revoke your consent to data processing as well as the right of data portability. To exercise your rights, please contact [STAIRCASE-Survey@tib.eu](mailto:STAIRCASE-Survey@tib.eu). ### Data protection responsibilities throughout the project (until Dezember 2024)

**Responsible authority regarding data protection** is the German National Library of Science and Technology (TIB), Welfengarten 1B, 30167 Hanover, Germany. Phone: +49(0)511 762-8989, Fax: +49(0)511 762-4076, Email: [information@tib.eu](mailto:information@tib.eu) (<mailto:information@tib.eu>).

**Data Protection Officer**, German National Library of Science and Technology (TIB), TIB Conti-Campus, Königsworther Platz 1B, 30167 Hanover, Germany. Phone: +49(0)511-762 8138, Email: [datenschutz@tib.eu](mailto:datenschutz@tib.eu) (<mailto:datenschutz@tib.eu>).

**The supervisory authority** is the State Commissioner for Data Protection of Lower Saxony, Prinzenstrasse 5, 30159 Hanover, Germany. Phone: +49(0)511 120-4500, Fax: +49(0)511 120-4500, Email: [poststelle@lfd.niedersachsen.de](mailto:poststelle@lfd.niedersachsen.de) (<mailto:poststelle@lfd.niedersachsen.de>).

Complaints may be lodged with the supervisory data protection authority of Lower Saxony (<https://lfd.niedersachsen.de/startseite/%20>) via their online form ([https://lfd.niedersachsen.de/startseite/meldeformulare/online\\_beschwerde/](https://lfd.niedersachsen.de/startseite/meldeformulare/online_beschwerde/)).

We ask you to voluntarily share your ORCID and/or LinkedIn profile and/or Twitter handle and/or Mastodon handle. We will use this information to collect data from the profiles up to the point of survey completion. We will not analyze your future activity. We will use the information we collected from any profiles you provided to us in the following way:

- We will use information from your ORCID profile to measure indicators of your academic career. Specifically, we will count the number of your publications, the number of positions you held in the past and the amount of third party funding you received.
- We will use information from your LinkedIn profile to collect information about the number and type of positions you held in the past.
- We will use information from your Twitter and/or Mastodon profile to measure indicators relevant to mental health and wellbeing in post texts.

Your social media profile information will be stored separately from your survey responses and will only be used to calculate average statistics such as publication output and sentiment in social media posts. We will only relate anonymized and aggregated information gathered from each of these three platforms to your survey responses. Raw data collected from your social media profiles will be stored separately from survey responses and deleted after analysis (see also our [general informed consent form](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_EN.pdf) ([https://projects.tib.eu/fileadmin/data/staircase/docs/informed\\_consent\\_EN.pdf](https://projects.tib.eu/fileadmin/data/staircase/docs/informed_consent_EN.pdf))). No personal identifiable data will be published by us. Please see the Data protection measures above for information on how the data is handled.
